## Summary

About:

As you know, people can no longer discover their talents due to reasons such as university entrance exams. For this reason, I started coding a little late, but I realized that this job was just for me. I first started by taking the Harvard University Computer Science course, this course improved me a lot. Thus, I entered the web field by making my first web page for myself and developed many projects.

Capabilities:

I have experience in programming languages such as Python, JavaScript, HTML, CSS. I have knowledge in user interface design. I am problem-solving oriented and team-oriented.

Goals:

I want to gain more experience in my career and produce projects that benefit society.
